OCCASIONAL PAPERS: NUMBER ONE
NOVEMBER 1974

PREFACE

The Disaster Research Unit was formed in December 1973 and is a research group within the Project Planning Centre for Developing Countries at the University of Bradford. Unit members are:

James Lewis ARIBA, Senior Research Fellow and Unit Leader

Philip O'Keefe, B.A.(Hons), Research Fellow

Kenneth Westgate, B.Sc.(Hons), is attached to the Unit as a Research Student.

This series of Occasional Papers of which this listing is the first, will contain the results of the Unit's work.

Disaster Research Unit, University of Bradford, Bradford, Yorkshire, BD7 1DP, England.

Bradford (0274) 33466.

INTRODUCTION

This document does not pretend to be anything other than it is, namely a list of literature contained within the Disaster Research Unit at the time of publication. It is hoped that those interested will refer to it and be able to locate the literature required within the Unit. The aim is to present interested parties with a comprehensive list of such literature as is available at the Unit and encourage application to the Unit for copies of any item on the list.

The indexing is simple and will enable each reader to locate the items of most use. The main index headings are categorised according to disaster type and are as follows:

Earthquake	1
Flood	2
Hurricane, typhoon, Tropical storm, tornado	3
Drought, famine, pest	4
Volcano	5
Tsunami	6
General, including civil	7
Environment	8
Miscellaneous	9

Item 7 includes those documents which contain information about more than one disaster type as well as those items on specific aspects of disaster which may refer to disaster types en passant.

Further subdivisions are made as follows:

Relief, rehabilitation, aid, reconstruction	A

Medical and health aspects	B
Nutritional and food aspects	C
Behavioural aspects	D
Physical, engineering and technical aspects	E
Administrative and organisational aspects	F
Planning and preplanning	G
Bibliography, literature lists, publication lists	H
Economic and insurance aspects	J
Warning and prediction	K
General	L

The list does not pretend to be a comprehensive bibliography. Nevertheless, it will help in sharing with those interested the nature and scope of the material collected so far by the Disaster Research Unit.
